Senior Software Engineer | Backend & Platform Engineer

Java | Distributed Systems | Platform Engineering | AI Developer Tools

---

Senior Backend Engineer with 7+ years of experience designing and building enterprise-scale backend systems across MarTech, FinTech, payment processing, investment management, and government platforms. Experienced in Java, Spring Framework, distributed systems, event-driven architectures, and AI-powered developer tooling. Proven track record of leading engineering teams, optimizing system performance, automating large-scale operational workflows, and delivering secure, scalable software used by enterprise customers worldwide. Hands-on experience with GCP, AWS, Docker, Kafka, and modern CI/CD practices.

SKILLS

Programming Languages	Java • TypeScript • JavaScript • Python • Bash
Backend Technologies	Spring Framework • Spring Boot • Spring MVC • Jersey • JSP • Servlets • REST APIs • NestJS • NodeJS • FastAPI
Architecture	Distributed Systems • Microservices • Event-Driven Architecture • TDD
Messaging	Apache Kafka • RabbitMQ
Databases & Caching	Oracle • PostgreSQL • MariaDB • MongoDB • Redis
Cloud & DevOps	AWS • GCP • Docker • Jenkins • Nginx • Tomcat
Testing	JUnit • Mockito • Selenium • JMeter
Tools	Git • Gradle • Maven • Jira • Linear • Notion

PROFESSIONAL EXPERIENCES

Senior Software Engineer, Full-time — Jul 2026 - Present
Optimizely — *Dhaka, Bangladesh*

- Designed and implemented observability and structured logging infrastructure for AI-powered Campaign workflows, improving production monitoring, debugging, and operational visibility.
- Accelerated adoption of AI-assisted software development by orchestrating internal AI agents into engineering workflows, improving developer productivity and accelerating feature delivery.

Software Engineer II, Full-time — Aug 2025 - Jun 2026
Optimizely — *Dhaka, Bangladesh*

- Designed and developed context-aware backend services powering Optimizely Opal, enabling AI-driven knowledge retrieval for Smart Campaigns.
- Automated enterprise customer onboarding by designing scalable provisioning workflows with structured logging, successfully onboarding 378 Campaign customers while eliminating weeks of manual operational effort.

Senior Software Engineer, Full-time — Jan 2023 - Aug 2025
Kona Software Lab Ltd. — *Dhaka, Bangladesh*

- **Card Personalization Service (GlobalPlatform & EMV)**
  - Customized and modernized a legacy Spring-based Card Personalization platform for Islami Bank Bangladesh, enabling successful deployment of GlobalPlatform-compliant personalization workflows.
  - Coordinated with engineering teams in South Korea to integrate personalization hardware through custom DLL development and machine interfaces.
  - Built an internal Retrieval-Augmented Generation (RAG) assistant using EMV, GlobalPlatform, Visa, and Mastercard specifications, reducing engineering documentation lookup time by approximately 75%.

  - Led a team of six engineers, mentoring developers and coordinating feature delivery across multiple project milestones.

- **Token Service Provider (EMV)**
  - Designed and developed enterprise tokenization services compliant with EMV specifications as part of the KONA Integrated Platform.
  - Built backend services following Test-Driven Development (TDD), maintaining 90–100% automated test coverage across critical modules.
  - Led a five-member engineering team while improving development workflows, sprint execution, and code quality.
- **KIWA Investment Management Platform**
  - Designed and implemented tenant-aware authorization supporting hierarchical role-based access control across multi-tenant investment organizations.
  - Architected a configurable approval engine supporting dynamic approval chains and substitute approvers for enterprise workflows.
  - Optimized complex database queries and backend services, improving throughput to approximately 300 transactions per second while supporting over 100 concurrent users.

Software Engineer II, Full-time — Jul 2021 - Dec 2022
Kona Software Lab Ltd. — *Dhaka, Bangladesh*

- Designed and implemented backend services for cryptocurrency wallet management supporting Bitcoin and Ethereum transaction workflows.
- Built transaction journal and fiat settlement services ensuring reliable financial transaction processing.

Software Engineer, Full-time — Oct 2020 - Jun 2021
Kona Software Lab Ltd. — *Dhaka, Bangladesh*

- Developed backend services for a Mobile Financial Services platform as part of a three-member engineering team.
- Designed and implemented circuit breaker mechanisms improving system resilience during third-party service outages.
- Integrated Bangla QR payment functionality into Dutch Bangla Bank Ltd. - NexusPay, supporting more than one million users following production launch.

Software Developer, Full-time — May 2019 - Oct 2020
CoKreates Limited. — *Dhaka, Bangladesh*

- Designed and developed four core ERP modules including Meeting Management, Leave Management, Training Management, and HR Management for Bangladesh Government's Government Resource Planning (GRP) platform.
- Supported production rollout across twelve government offices including the Planning Ministry and ICT Division.
- Collaborated directly with stakeholders in an Agile environment, rapidly delivering evolving business requirements while maintaining software quality.

EDUCATION

BSc in Computer Science and Engineering — Feb 2015 - Apr 2019
Bangladesh University of Engineering and Technology (BUET) — *Dhaka, Bangladesh*
